ANNUAL ON-PROPERTY AUCTION Friday 2nd August 2013 200 Rams

INSPECTION - 9:00 am AUCTION - 1:00 pm

Brucellosis
Accreditation

Ovine Johnes Disease
MN3 Accreditation

Food & refreshment will be offered throughout the day.

Welcome to the 2013 Kamora and Netley Park Poll Merino Annual Auction

We aim to produce a large deep bodied animal with heavy bone and good carcass traits. Focusing on a well defined medium crimp with good staple length and to produce soft white high yielding wool. We use the best genetics from Moorundie Park and Nyowee, our own Kamora and Netley Park bloodlines, plus other occasional infusions that suit our breeding objectives

This year Kamora and Netley Park's auction rams are all March/April '12 drop.

All micron tests are from their current fleece,
tested in mid June 2013 by AWTA.

2013 Ram Sale

At the 2013 Kamora and Netley Park annual ram sale clients will be able purchase the progeny of our newest investments in 2011.

Boonoke Poll 0.001 purchased for \$50,000

Uardry semen sire purchased for \$16,000

We are very pleased with the results and trust you, our clients will also benefit from these bloodlines.

2013 Royal Adelaide Show

Kamora and Netley Park will be selling 4 rams at the Adelaide Ram Sale at the Wayville Showgrounds on Friday 13th September.

Tag No 7 and Tag No 24 offered through Landmark

Tag No 16 and Tag No 19 offered through Elders

Please contact Paul (08) 8578 3427 or Justin (08) 8578 7016 if you require any further information about these rams.

Stud Families

Aurdry - Large Notch Left Front

Kam Dan - 2 Small Notches Left Front

Nyowee - Large Notch Each Side at Bottom

Wallaloo Park - 1 Small Notch End Ear (Either End)

All others are Kamora and Netley Park Sires

* Please note that rams in Pens 1 to 10 were blade shorn on 1st March
 All others have been machine shorn. All rams shorn at 6mth wool.

Guide to Ram Selection

- Objective Measurement figures are only one part of the ram selection process.
- Rams must be structurally acceptable and for the characteristics the buyer is seeking.
- Rams must also be suitable for the environment and climate in which they are going to be used.
- Buyers should ensure they are satisfied with the conformation, size, wool type and development of each ram.
- Having selected rams for subjective and visual requirements the buyer can then use the objective measurement and test results to refine their final selection.

Wool Testing Glossary

Average Fibre Diameter expressed in microns.

S.D. is the standard deviation of fibre diameter. It is a measure of the fibre diameter variation within the sample. The smaller the S.D. value, the more evenly sized the fibres are.

C.V. is the co-efficient of variation of fibre diameter. As a guideline, in **mature, good nutritionally fed wools** the C.V. values of good tests results should be less than 20% whilst tests greater than 23% are undesirable.

Comfort Factor as a processing guide and expressed as a percentage, the comfort factor indicates the fibres less than 30 microns. Fibres over 30 microns are associated with the itch factor.

Success at Adelaide Ram Sale 2012

Sold to Moorundie Park for \$25,000

Sold to Eric McKenzie for \$8000

Progeny of these top new sires available at this year's on-property auction

Boonoke Poll 0.001 purchased for \$50,000

Uardry semen sire purchased for \$16,000

Thank you to all purchasers and underbidders of Kamora and Netley Park rams at our annual ram auction. We value your support.

Please let us know if we can be of further assistance.

Also all visitors are invited to join us for refreshments and tea at the conclusion of the sale.
