Welcome to the Annual 2018 Kamora Netley Park Poll Merino Ram Auction

The Kamora Poll Merino stud was founded in 1963. In 1999 we made the decision to purchase the entire Netley Park Poll Merino stud with the breeding and type being very similar to our established breeding lines.

The stud is based on Moorundie Park bloodlines, but we have also introduced select rams from other top Australian studs. More recent purchases include: Poll Boonoke PB1 (in partnership) for \$50,000, Charinga Poll with 2 rams for \$24,000 and \$11,000, and another Moorundie Park sire for \$8400. Moorundie Park rams have been purchased up to \$10,000 for a half share of one of their keeper sires. Our most recent purchase was Moorundie PB201, purchased for \$30,000 (in partnership) with progeny in this catalogue.

Our breeding objective is to produce large framed and well-structured sheep with bright, white and soft handling wool in the 18 to 20 micron range with fleece weights of 8 to 9 kg. These qualities have attracted buyers from all Mallee districts, the south east and Kangaroo Island, plus New South Wales and Victoria. We sell 300 to 350 rams annually.

Sale highlights in recent years include, \$25,000 to the Moorundie Park stud, and \$10,000 three times in 2013, to the Charinga stud, St Arnaud, Vic; Kilcoolin Pastoral Co, Avoca, Vic, and the Minta stud, Mt Cooper, SA., and 2 rams at \$9500 each in Adelaide in 2015.

Our annual sale is always held on the first Friday in August and last year topped at \$7800. We are proud of all our clients and sincerely thank them for their continuing support.

As part of our client service, we offer a sheep classing for any clients who are interested.

Enjoy the day and we wish you all the best with your purchases. Lunch is provided throughout the day, with tea and light refreshments following the sale.

Stud Sires

K3 - KAMORA NETLEY PARK 3
BOON - BOONOOKE
K381 - KAMORA NETLEY PARK 381
CHAR - CHARINGA

PB - MOORUNDIE PB201

BAN - BANAVIE
NE 20 - MOORUNDIE
SYN - SYNDICATE
WIL - WILLANDRA
NY - NYOWIE

Shearing and figures

All rams are blade regulation and machine shorn and carry 6 months of wool growth. All micron tests are from their current fleece, tested in mid June 2018 by AWTA.

Guide to Ram Selection

- Objective Measurement figures are only one part of the ram selection process.
- Rams must be structurally acceptable for the characteristics the buyer is seeking.
- Rams must also be suitable for the environment and climate in which they are going to be used.
- Buyers should ensure they are satisfied with the conformation, size, wool type and development of each ram.
- Having selected rams for subjective and visual requirements the buyer can then use the objective measurement and test results to refine their final selection.

Wool Testing Glossary

Average Fibre Diameter expressed in microns.

S.D. is the standard deviation of fibre diameter. It is a measure of the fibre diameter variation within the sample. The smaller the S.D. value, the more evenly sized the fibres are.

C.V. is the co-efficient of variation of fibre diameter. As a guideline, in **mature, good nutritionally fed wools** the C.V. values of good tests results should be less than 20% whilst tests greater than 23% are undesirable.

Comfort Factor as a processing guide and expressed as a percentage, the comfort factor indicates the fibres less than 30 microns. Fibres over 30 microns are associated with the itch factor.

KAMORA NETLEY PARK POLL MERINO STUD

SHEEP CLASSER - MICHAEL ELMES

Michael Elmes started as a jackeroo at Uardry Merino Stud in 1978. During three years in the ram shed he won numerous junior judging and sheep handling prizes. In his nine years at Uardry, Michael's final position was assistant manager.

He took over as Manager of Wanganella Merino Stud in 1990. Michael was responsible for the breeding, marketing and selling of Wanganella genetics for over 14 years.

Michael has judged at leading Merino shows throughout Australia and Argentina, including Sydney Royal, Canberra Royal, Wagin Woollarama, Dubbo National, Comodoro Rivadavia, Mid State Field Days and numerous provincial shows.

In 2004 Michael registered his own business SMART STOCK as an independent advisor on livestock appraisal and management issues. He classes sheep and chooses genetics from a wide range of environments, improved to pastoral, 750mm to 75mm rainfall. Michael selects between 700 and 900 rams annually on behalf of clients.

He has been in an unique position to class the winning flock of the Lake Cargelligo Ewe competition for five consecutive years, four different clients and four different bloodlines. In 2013 he achieved the trifecta, 1st, 2nd, 3rd !! Michael also classed the winning flock of the prestigious Don Brown Ewe Competition at Condobolin, both in 2013 and 2014
