GOLDING LIVESTOCK AGENCIES**

Welcome to the Annual 2019 Kamora Netley Park Poll Merino Ram Auction

The Kamora Poll Merino stud was founded in 1963. In 1999 we made the decision to purchase the entire Netley Park Poll Merino stud with the breeding and type being very similar to our established breeding lines.

When deemed appropriate, the stud has continued to invest in top outside sires that match our breeding objectives and will enhance our breeding program. The most recent of these was a top Poll (in partnership) from the Willemenup stud, Gnowangerup, WA for \$25,000, with his first progeny featuring in this catalogue.

The family lines these infusions instigate are enhanced and expanded through the diligent use of several top sons each year. We believe this produces more consistency of type and breeding predictability within the family lines.

Our breeding objective is to produce large framed and well-structured sheep with bright, white, well nourished and soft handling wool in the 18 to 20 micron range, with fleece weights of 8 to 9 kg. These qualities have attracted buyers from all Mallee districts, the South East and Kangaroo Island, plus New South Wales and Victoria. We sell around 300 to 350 rams annually.

Our annual sale is always held on the first Friday in August and last year topped at \$6400. We are proud of all our clients and sincerely thank them for their continuing support, while also extending an special invitation and welcome to any new clients who join them.

As part of our client service, we offer sheep classing for any clients who are interested.

Lunch is provided throughout the day, with tea and light refreshments following the sale. Enjoy the day and we wish you all the best with your purchases.

Stud Sires

KNP - KNP SYNDICATE

KNP55 - KAMORA NETLEY PARK 55

KNP60 - KAMORA NETLEY PARK 60

KNP381 - KAMORA NETLEY PARK 381

P. BOONOKE - POLL BOONOKE

CHARINGA - CHARINGA

C. PEARLER - CHARINGA PEARLER

BANAVIE - BANAVIE

WILLEM - WILLEMENUP

CODD POLL - CODDINGTON POLL

TAM X WILL - TAMALEUCA X WILLANDRA

Shearing and figures

All rams are blade regulation and machine shorn and carry 6 months of wool growth. All micron tests are from their current fleece, tested in mid June 2019 by AWTA.

**LANDMARK LOXTON
GOLDING LIVESTOCK AGENCIES**

Guide to Ram Selection

- Objective Measurement figures are only one part of the ram selection process.
- Rams must be structurally acceptable for the characteristics the buyer is seeking.
- Rams must also be suitable for the environment and climate in which they are going to be used.
- Buyers should ensure they are satisfied with the conformation, size, wool type and development of each ram.
- Having selected rams for subjective and visual requirements the buyer can then use the objective measurement and test results to refine their final selection.

Wool Testing Glossary

Average Fibre Diameter expressed in microns.

S.D. is the standard deviation of fibre diameter. It is a measure of the fibre diameter variation within the sample. The smaller the S.D. value, the more evenly sized the fibres are.

C.V. is the co-efficient of variation of fibre diameter. As a guideline, in **mature, good nutritionally fed wools** the C.V. values of good tests results should be less than 20% whilst tests greater than 23% are undesirable.

Comfort Factor as a processing guide and expressed as a percentage, the comfort factor indicates the fibres less than 30 microns. Fibres over 30 microns are associated with the itch factor.

KAMORA NETLEY PARK POLL MERINO STUD

SHEEP CLASSER - MICHAEL ELMES

Michael Elmes started as a jackeroo at Uardry Merino Stud in 1978. During three years in the ram shed he won numerous junior judging and sheep handling prizes. In his nine years at Uardry, Michael's final position was assistant manager.

He took over as Manager of Wanganella Merino Stud in 1990. Michael was responsible for the breeding, marketing and selling of Wanganella genetics for over 14 years.

Michael has judged at leading Merino shows throughout Australia and Argentina, including Sydney Royal, Canberra Royal, Wagin Woollarama, Dubbo National, Comodoro Rivadavia, Mid State Field Days and numerous provincial shows.

In 2004 Michael registered his own business SMART STOCK as an independent advisor on livestock appraisal and management issues. He classes sheep and chooses genetics from a wide range of environments, improved to pastoral, 750mm to 75mm rainfall. Michael selects between 700 and 900 rams annually on behalf of clients.

He has been in an unique position to class the winning flock of the Lake Cargelligo Ewe competition for five consecutive years, four different clients and four different bloodlines. In 2013 he achieved the trifecta, 1st, 2nd, 3rd !! Michael also classed the winning flock of the prestigious Don Brown Ewe Competition at Condobolin, both in 2013 and 2014
