Welcome to the Annual 2014 Kamora Netley Park Poll Merino Ram Auction

The Kamora Poll Merino stud was founded in 1963. In 1999 we made the decision to purchase the entire Netley Park Poll Merino stud with the breeding and type being very similar to our established breeding lines.

The stud is based on Moorundie Park bloodlines, but we have also introduced select rams from other top Australian studs. More recent purchases include: Poll Boonoke PB1 (in partnership) for \$50,000, Charinga Poll with 2 rams for \$24,000 and \$11,000, and our latest Moorundie Park sire for \$8400. Moorundie Park rams have been purchased up to \$10,000 for a half share of one of their keeper sires.

Our breeding objective is to produce large framed and well-structured sheep with bright, white and soft handling wool in the 18 to 20 micron range with fleece weights of 8 to 9 kg. These qualities have attracted buyers from all Mallee districts, the south east and Kangaroo Island, plus New South Wales and Victoria. We sell 300 to 350 rams annually.

Recent highlight sales include, \$25,000 to the Moorundie Park stud, and \$10,000 three times last year to the Charinga stud, St Arnaud, Vic; Kilcoolin Pastoral Co, Avoca, Vic, and the Minta stud, Mt Cooper, SA (see back cover).

Our annual sale is always held on the first Friday in August and last year topped at \$4200. We are proud of all our clients and sincerely thank them for their continuing support.

As part of our client service, we offer a sheep classing for any clients who are interested.

Enjoy the day and we wish you all the best with your purchases. Lunch is provided throughout the day, with tea and light refreshments following the sale.

Stud Families

Uardry	Large notch in front of left ear
Kamora 1	1 small notch in back of both ears
Nyowee	Large notch at back of both ears
Boonoke	1 large notch in end of left ear
Willandra GP	1 large notch in back of right ear

All others are from Kamora Netley Park sires

Shearing and figures

All rams are blade regulation and machine shorn and carry 6 months of wool growth. All micron tests are from their current fleece, tested in mid June 2014 by AWTA.

Guide to Ram Selection

- Objective Measurement figures are only one part of the ram selection process.
- Rams must be structurally acceptable and for the characteristics the buyer is seeking.
- Rams must also be suitable for the environment and climate in which they are going to be used.
- Buyers should ensure they are satisfied with the conformation, size, wool type and development of each ram.
- Having selected rams for subjective and visual requirements the buyer can then use the objective measurement and test results to refine their final selection.

Wool Testing Glossary

Average Fibre Diameter expressed in microns.

S.D. is the standard deviation of fibre diameter. It is a measure of the fibre diameter variation within the sample. The smaller the S.D. value, the more evenly sized the fibres are.

C.V. is the co-efficient of variation of fibre diameter. As a guideline, in **mature, good nutritionally fed wools** the C.V. values of good tests results should be less than 20% whilst tests greater than 23% are undesirable.

Comfort Factor as a processing guide and expressed as a percentage, the comfort factor indicates the fibres less than 30 microns. Fibres over 30 microns are associated with the itch factor.

NEW SIRE PURCHASE

We purchased 2 rams from the Polkinghorne family, Charinga stud, via St Arnaud, Vic. This is the top priced ram of those two, for \$24,000.

A SELECTION OF PHOTOS FROM OUR 2013 ANNUAL ON-PROPERTY RAM SALE

Pictured with the two highest priced rams at the Kamora Netley Park Poll Merino ram sale are Landmark auctioneer Gordon Wood; Gail and Roger Duell with the ram they purchased for \$4000 and held by sale vendor Justin Boughen; Brian Boughen, Borrika holding the \$4200 top priced ram that he purchased; and Murray Greenfield, Landmark Karoonda.

Dale West, Kilcoolin Pastoral Co, Euroa was the biggest volume buyer at the Kamora Netley Park sale, purchasing 17 rams at a \$2176 average. He is pictured with Kamora Netley Park principal Justin Boughen after loading and ready for the 10 hour trip home.
